MANUFACTURER SUMMARY: 'The XE brings together the latest Jaguar innovation, technology and design.' CLEAN TECHNOLOGIES INCREASE EFFICIENCY AND PERFORMANCE The XE uses a range of technologies to reduce fuel consumption and Co2 emissions. The XE engines come with stop/start. The engine shuts down when you come to a complete halt and restarts immediately when required to save fuel, especially during city driving. The lightweight aluminum architecture of the XE, designed with advanced aerodynamics, offers low drag co-efficient of Cd 0.28. The XE cuts through the air with ease, meaning less work for the engine. INNOVATIVE INTELLIGENT TECHNOLOGIES The XE offers adaptive bi-function xenon headlamps, traffic sign recognition and adaptive speed limiter, lane keep assist with driver condition monitor, autonomous emergency braking, adaptive cruise control with queue assist and advanced park assist, technologies that make every driver easier and safer. CONNECTED TECHNOLOGIES InControl Touch Pro, The Next Generation Infotainment System, offers a range of new features to enhance every journey. These include: Meridian Digital Sound Systems and Connected Navigation. INTERIOR COCKPIT FEEL Form-hugging seats and a raised center console feel as though you are driving in a cockpit. Throughout the XE, the natural forms of the interior architecture lend themselves to the extensive choice of contemporary or traditional materials and finishes. REVIEW: 'The Jaguar XE is a handsome sedan that makes style the priority. The cars' poised and engaging handling, in particular, is among the best you'll find. The new XE front and rear fascia's give it more detail and make it look bigger. The Center Console features a touch sensitive panel for the climate control. An updated infotainment system is also part of the interior upgrade for 2020. The trunk capacity is larger than average.' 'Our favorite XE safety features are: Blind Spot Assist, which warns you about approaching vehicles from up to 3000 feet away that might enter your blind spot. Pedestrian Detection uses a forward-facing camera to scan for pedestrians and engages automatic braking if a collision with a pedestrian seems imminent. Lane Keep Assist provides corrective steering if the driver veers too closely to lane markings on either side without the turn signal engaged.' Source: Edmunds Recent Arrival!
